# What Is Solidus DAO?

Solidus DAO LLC is a legally recognized Decentralized Autonomous Organization organized under Wyoming law — combining the protection of an LLC with blockchain-native governance, transparency, and community coordination.

## What It IS

- Governance & Coordination Layer
- Member-driven proposal system
- Blockchain-native decision-making
- Public-benefit & ecosystem initiatives

## What It Is NOT

- An investment fund
- A securities issuer
- A profit-pooling vehicle
- An investment manager

## WHY Wyoming

- Statutory DAO LLC Recognition
- Smart-contract legal supremacy
- Forward-thinking crypto regulation
- Limited liability for members

# SOLID Token — Governance & Utility

## Token Overview

Blockchain	<b>Base</b>
Initial Price	<b>USD \$0.05</b>
Total Supply	<b>1 Billion SOLID</b>
Founders Allocation	<b>250 Million SOLID</b>
Initial Launch	<b>200 Million SOLID</b>
Max per Buyer at Initial Launch	<b>20 Million SOLID</b>

## Token Allocation

■ Founders ■ Launch Offering ■ Reserved

SOLID is NOT a security. It confers NO equity, profit rights, OR investment entitlements.

# Governance Framework

# Treasury & Operations

## Treasury Expenditures

- Operating expenses & infrastructure
- Community & public-benefit initiatives
- Ecosystem grants & tooling
- > 50% committee approval required
- No profit distributions to members

## Management Company

- DAO-appointed operational arm
- Founders are employees of Management Co.
- Agent of DAO — no independent ownership
- Handles execution of legal, treasury & tooling
- Approved via DAO vote

## Known DAO Expenses

- Wyoming Registration & Maintenance
- Registered Agent Services
- Smart Contract Dev & Audits

- Deployment Fees
- Website Hosting
- Management Co. Services & Fees

# Security, AI & Compliance

## Security Controls

- Multisig controls for fund movement
- AI-assisted treasury anomaly detection
- Smart contract audits & upgrade paths
- Incident response: freezes, burns, halts

## AI Usage

- Governance process support
- Proposal vetting assistance
- Treasury & security monitoring
- Human oversight & transparency required

## Insurance (Planned)

- Smart contract failure coverage
- Cybersecurity / hacking insurance
- Post initial token sales

# Strategic Advantages

## Low-to-No DAO-Level Securities Risk

Clear governance / investment separation eliminates securities exposure at the DAO layer

## Single-Token Simplicity

One token (SOLID) for governance and utility — no complex multi-token structures

## AI-Enhanced Operations

AI tools support treasury monitoring, anomaly detection, and governance coordination

## Wyoming Legal Foundation

Full statutory DAO LLC status — smart-contract supremacy recognized by law

## Blockchain-Native Governance

On-chain voting, multisig execution, and audit trails for full transparency

## SPV-Level Flexibility

External investment structures can be designed for compatibility with the appropriate regulatory frameworks (e.g. Reg D, Reg S, offshore, non-US based)

# Solidus FOUNDERS & Management - TEAM of 5

**Larry Bolterstein** – A seasoned executive and financial strategist with a proven track record of driving exponential business growth.
